DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by koyanagi Makoto (JP 2002-219830, Cited by the applicant).

Regarding claim 1, Makoto discloses a recording apparatus comprising: a recording head for performing recording on a medium according to first recording data [0036];

a controller (CPU 16) for managing control of said recording apparatus [0037];

a data generator that is connected to said controller via a first transfer path, said data generator being capable of generating said first recording data (generating print image data) [0037];

a memory that is connected to said data generator via a second transfer path [0032]; and a data obtaining section for obtaining data from an external source, wherein: second recording data that are stored in said memory based on the data obtained by said data obtaining section are transferred to said data generator through said second transfer path; and based on said second recording data that have been transferred, said data generator generates said first recording data [0032-0047] and [0054].

Regarding claim 2, Makoto discloses a recording apparatus according to claim 1, wherein: said data generator has a plurality of processing units; said memory is capable of

storing unprocessed data that are to be processed by each of said processing units and processed data that have been processed by each of said processing units; and each of said processing units obtains the unprocessed data from said memory via said second transfer path, processes the obtained unprocessed data, and transfers the processed data that have been processed to said memory via said second transfer path [0043-0048].

Allowable Subject Matter

3. Claims 3-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
